Open to work: Sales Operations Manager, Commercial Excellence Lead, AI Adoption Lead (Commercial)

About

I have led sales and commercial teams in Singapore and the region for 24 years. Most of that time was in consumer goods and industrial distribution. I built forecasts, ran key accounts, and fixed pipelines that did not convert.

My role ended in a regional restructuring in May 2026. I now use this time to retrain. I am studying how generative AI changes sales operations: lead triage, proposal drafting, account reviews and pricing analysis.

I am not a programmer. I want to use these tools well, measure the result, and show the numbers to a hiring manager.

Activity

> Week 4 of my GenAI course. I used ChatGPT and a synthetic dataset to score 200 leads. It took 40 minutes instead of a day. The next step is to check the accuracy against the real outcomes.
